# How to Connect an Existing Marketplace Listing to Haircut Now Biz

Haircut Now Biz App · https://haircutnow.com/docs/how-to-connect-an-existing-marketplace-listing-to-haircut-now-biz/

Your website listing and Haircut Now Biz use the same verified account connection. Complete website listing setup first, then sign in to the current Biz app to open that listing and its calendar.

## If you already own a claimed individual listing

1. Sign in to Haircut Now on the website with the account that owns the listing.
2. Open your listing management page and confirm that the original listing is attached to that account.
3. Install or update Haircut Now Biz, then sign in using the same website account.
4. Complete the sign-in prompts and return to the app if a browser opens.
5. Check My Business and Schedule for the original listing, supported photos, and calendar.

A verified listing owner does not need to create a duplicate listing or complete a separate new-barber registration inside the app. Existing services, prices, availability, and appointments belong to the original listing.

## If your listing is still unclaimed

Find your existing listing on the website and choose its claim option. Sign in or create the account you intend to keep, complete the ownership steps shown, and then use that same account in Biz. A matching business name or contact email alone does not establish listing ownership.

## If you already use a Biz account

Use your existing Biz sign-in route first. If that account already has a verified listing connection, open the original listing from My Business. Follow any account or ownership prompt that is actually shown;

do not unlink or register another account just to repeat setup.

## Returning from the browser

Finish the website step and use the offered return-to-app action, or reopen Biz and sign in with the same account. If you are using an older app that still offers **Connect my existing listing** or **Check connection**, follow its prompts or update the app. Those legacy screens are not an extra registration requirement for a new website listing owner.

## Listing not found or wrong account

Confirm that the website account owns the claimed listing and that Biz is using that account. Check the sign-in guide before creating anything new. If another account owns the original listing or you cannot access it, contact support@haircutnow.com for ownership help.

A Digital Barber Card is optional for this workflow. Card-only sign-in does not provide the barber listing and calendar workspace.
