How to Activate, Deactivate, or Delete Shop Booking Services

Shop Bookings · https://haircutnow.com/docs/how-to-activate-deactivate-or-delete-shop-booking-services/

Package requirement: Shop Bookings is included only with **Shop Complete**.

Use service visibility controls when an offering changes.

Activate or deactivate a service

1. Open **Booking → Services**.
2. Select a **Team member** and find the service.
3. Choose **Activate** or **Deactivate**.
4. Wait for **Saved.** and check the public booking page.

Use **Unassign** when the change concerns whether the selected provider offers the service. Activation changes the service’s active setting; check other providers using that service before changing it.

Delete a service

1. Find the correct service.
2. Choose **Delete**.
3. Read the confirmation and confirm only when you intend to remove it.

Services with upcoming appointments cannot be deleted. Review those appointments before trying again.

Check existing appointments

Deactivating or unassigning a service should not be treated as canceling its bookings. Review affected appointments and make any needed changes through **Appointments**.
