How to Add a Booking Link to Your Digital Barber Card

Digital Barber Card · https://haircutnow.com/docs/how-to-add-a-booking-link-to-your-digital-barber-card/

Your card can direct customers to the booking destination available under your plan.

Pro: use an external booking page

1. Open your card manager.
2. Choose **Edit card → Links**.
3. Set **Booking destination** to **External booking page**.
4. Enter your **External booking URL**.
5. Choose **Save changes**.
6. Open **View public card** and test the booking button.

Use your customer-facing booking page, such as Booksy, The Cut, StyleSeat, Square, or your own booking website. Do not use an administrator or sign-in URL.

Use Haircut Now directory booking

If **Haircut Now directory** is offered, you can select it as the destination. Availability depends on your connected listing’s booking access.

A Basic card tied to an eligible paid individual listing can show its Haircut Now directory booking link. A Basic card tied to a free listing is contact-only.

If the booking button is missing

Check your plan, selected destination, and saved URL. If directory booking should be available, verify the connected individual listing and its booking access.

A booking-button click opens the destination; it does not itself confirm an appointment.
