How to Sign In to Haircut Now Biz or Create a Barber Account

Haircut Now Biz App · https://haircutnow.com/docs/how-to-sign-in-to-haircut-now-biz-or-create-a-barber-account/

Choose the sign-in route that matches the account you already have.

App screens depend on the version currently available for your device. If an option is missing, check for an available update or use the linked website.

Existing Biz barber

1. Open Haircut Now Biz.
2. Enter your registered phone number and password.
3. Choose **Login**.
4. Confirm your profile and business are correct.

Use **Forgot password** if needed. Follow the verification steps rather than creating another barber account.

If the app specifically says you need to set up a password, use its password-setup or reset route. A website password and a Biz phone/password login are not automatically interchangeable.

New barber

Choose the new-account option shown in your app. In the Haircut Now email flow, enter your email, verify the code, then create your password and choose **Save password and continue**. You should reach the account options directly. Choose **Set up my card** for Card setup. If you are using the Biz phone-registration route, complete its phone verification and My Business setup.

Existing Marketplace listing owner

If you own a listing but do not have Biz access, use **Connect my existing listing** when shown. This flow verifies the website account and listing before creating Biz credentials.

If you already have a Biz account, sign in to that account first and use its connection tools.

Digital Barber Card-only access

Sign in to your Digital Barber Card opens the connected Haircut Now sign-in flow. Card-only access may show **My Card / Products / Account** instead of the four Biz tabs.

A Card-only login does not itself activate same-day barber access.

Returning to your account

Use your saved password for the same sign-in route. Leaving Card setup, returning from the browser, or reopening the app should retain a valid session; you do not need to sign out or confirm the same connection on every visit. A genuine expired session or an explicit sign-out may require sign-in again. If setup is unfinished, continue it from your account options.

Wrong account opens in the browser

Check which Haircut Now account the browser is using. Use the offered account-switch or restart option and sign in with the account linked to your Biz profile.

Never share your password or verification code with support or another user.
