What Are Haircut Now Appointments?

Getting Started with Appointments · https://haircutnow.com/docs/what-are-haircut-now-appointments/

Haircut Now online appointments let clients book an available service and time directly from an eligible listing.

How it works

1. The client opens the barber’s public listing.
2. They select a service and available appointment time.
3. They provide the required details and complete the booking.
4. They review the confirmation and appointment information.

An available time may be today or a future date. Selecting a time alone does not complete a reservation.

What barbers manage

Premium individual listing owners manage services, prices, durations, working hours, breaks, time off, clients, and appointments through Haircut Now’s booking tools.

Configured email/SMS messages can provide confirmations, updates, reminders, or follow-ups. Delivery depends on enabled messages and usable contact details; check the appointment calendar for the saved record.

Separate from same-day requests

Online booking reserves time with the selected provider. Same-day requests are sent to eligible nearby barbers and follow a separate response and confirmation process.

Start with the Premium online booking guide. For shop teams, see Shop Bookings help.
